

# MARBLEHEAD LIGHT DEPARTMENT

## Energy Efficiency Rebate Program

In an effort to encourage energy efficiency in Town, the Light Department is offering rebates to residential customers who purchase energy efficient appliances, which tend to cost more than their less energy efficient counterparts. In addition, rebates are available for those customers who wish to improve the insulation in their own home, or purchase a programmable setback thermostat.

Energy efficient appliances typically save 15-50% in energy costs, and can help reduce the need for additional generation during peak times.

Please see guidelines below for qualified products, rebates, and potential savings. If you would like more information about the program please contact Cindy Snow, Energy Services Advisor, at (781)631-0240.

***Funds are limited, find out about rebates right away!***

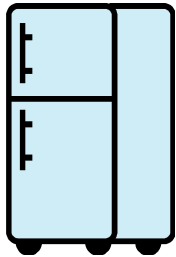

***You must have an active account with the Marblehead Light Department.***

***Appliances must be installed at account location.***

***Information for rebates must be presented within 12 months of the date of purchase.***

***Marblehead Light Department reserves the right to inspect the installation premises.***

***Cannot be combined with other utility rebates.***

### REFRIGERATORS

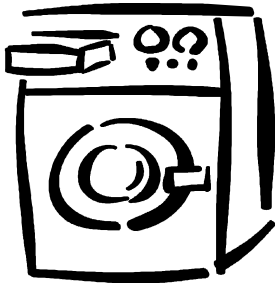

(Can save up to 30% on energy use)

Must be Energy Star compliant

Qualified energy efficient refrigerators are eligible for a **\$100** rebate.

In addition MMLD will pay up to **\$25** for disposal costs for the old refrigerator. To qualify for a rebate, refrigerators must be Energy Star compliant and at least 14 cubic feet in capacity. Refrigerators that are compliant will have the Energy Star logo on the yellow Energy guide label attached to the refrigerator.

## CLOTHES WASHING MACHINES

(Can save up to 50% on energy and up to 40% on water and sewer bills)

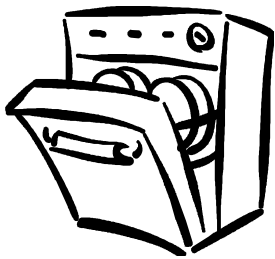

Must be Energy Star compliant

With an **MEF** (Modified Energy Factor) of **1.42 - 1.9 =**

**REBATE            \$50**

With an **MEF** of **2.0 or greater =**

**REBATE            \$100**

## DISH WASHERS

(Can save up to 25% on energy and water use)

Must be Energy Star compliant

With an **EF** (Energy Factor) of up to **.67=**

**REBATE            \$25**

With an **EF** of **.68 or greater =**

**REBATE            \$50**

## ROOM UNIT AIR CONDITIONERS

(Can save about 15% on energy use)

Must be Energy Star compliant

**REBATE    50% of purchase price up to    \$50**

## **CENTRAL AIR CONDITIONERS**

**(Can save up to 20% on energy use)**

Must be Energy Star compliant

With a **SEER** (Seasonal Energy Efficiency Ratio) of **13**  
and a **TXV** (Thermostatic Expansion Valve)

(Manufacturer's specification sheets must be provided)

**REBATE     \$325**

**\$375 with ECM** (Electronically Commutated Motor)  
on the indoor fan

With a **SEER** (Seasonal Energy Efficiency Ratio) of **14 or greater**  
and a **TXV** (Thermostatic Expansion Valve)

(Manufacturer's specification sheets must be provided)

**REBATE     \$475**

**\$525 with ECM** (Electronically Commutated Motor)  
on the indoor fan

## **CENTRAL AIR TO HEAT PUMP SYSTEMS**

**(Can save up to 20% on energy use)**

Must be Energy Star compliant

With a **SEER** (Seasonal Energy Efficiency Ratio) of **13**  
and a **HSPF**(Heating Seasonal Performance Factor) of **8.5**  
and a **TXV** (Thermostatic Expansion Valve)

(Manufacturer's specification sheets must be provided)

**REBATE     \$325**

**\$525 with ECM**(Electronically Commutated Motor)  
on the indoor fan

With a **SEER** (Seasonal Energy Efficiency Ratio) of **14 or greater**  
and a **HSPF**(Heating Seasonal Performance Factor) of **8.5**  
and a **TXV** (Thermostatic Expansion Valve)

(Manufacturer's specification sheets must be provided)

**REBATE     \$475**

**\$675 with ECM**(Electronically Commutated Motor)  
on the indoor fan

## **PROGRAMMABLE, SETBACK CLOCK THERMOSTATS**

**(Can save up to 15% on energy use)**

Must be able to set, to automatically turn down the heat when you don't need it, and turn it up when you do.

### **REBATE:**

**50%** of the purchase price of **ONE** thermostat (**non elect. heat**)

**50%** of the purchase price of **up to 2** thermostats (**elect. heat**)

(Cannot be combined with other utility rebates)

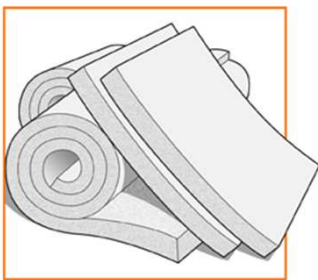

## **DEHUMIDIFIERS**

**(Can save 10-23% on energy use)**

Must be Energy Star compliant

**REBATE      \$20**

ORNL 07-0210561ah

## **INSULATION UPGRADE & IMPROVEMENT**

**(Reduces heating and air conditioning costs)**

Customer must have an inspection done by the Marblehead Light Department before adding new insulation. Once the new insulation has been installed, customer must contact the Marblehead Light Department for a second inspection and verification of work done. Customer must provide a dated receipt for the materials and work done. Rebates will be: **50% of the cost for the upgrade up to a maximum of \$1600.**

Call Cindy Snow at 781-631-0240 for more information.

(Cannot be combined with other utility insulation rebates)

(Not intended for new construction)
